** Gas springs are custom built and cannot be returned **

Goods are travelling at the risk of the customer, Gemini Gas Springs Inc. does not accept any liability after goods have left our warehouse.

In applications where damage or injury could occur caused by a broken gas spring due to wear, damage or or improper use, additional preventive safety precautions must be taken by the client. It is the responsibility of the client to observe possible safety issues and suitability of gas springs for the respective application. Gas springs are for lifting and supporting objects and may not be used as a safety device.
